P3 HANDHELD MEASURING SYSTEM

The Edwards P3 handheld measuring system is the essential device for on-site service calls and on the spot flexible checking. Thanks to the easy use and integrated measurement data memory, pressures can be directly measured at different locations for monitoring the application. Owing to the advanced measuring range of the high-precision Piezo/Pirani sensor, pressure measurement in the range of 1200 to 5×10^{-4} mbar can be displayed.

The instrument can also be operated completely under vacuum conditions and with the integrated memory function it is possible to store and display up to 2000 measured values.

THE READY TO GO HANDHELD MEASURING SYSTEM

- Direct display of measuring values
- Developed for use in demanding environments
- Mains independent power supply
- High-precision measurements of common gas types
- Internal storage and display of up to 2000 data points
- Export and analysis of stored measurement values via USB interface
- Optional online analysis of measurement values via USB interface

With the integrated battery, the device can be attached and operated at any pressure measuring point, and directly display or store up to 2,000 values for later evaluations and visualisations. All data values stored can be exported and displayed on a computer via USB link and by means of the optional software. The software is especially useful for setting up the devices or calculating rises in pressure for detecting rough leaks.

The accessory carry case, which provides storing and transport protection for the P3 gauge, includes; VacuGraph™ software, spare battery, USB link, mains power adaptor, with each having its own dedicated space in the case.

FEATURES AND BENEFITS

- Measurement range 1200 to 5×10^{-4} mbar (7 decades)
- Usage in vacuum is possible
- Data logging via USB interface or using the internal memory to store up to 2000 values which can then be exported to PC
- Cordless power supply with standard 9 V battery or 12 V a.c. adapter in the accessory pack
- Pressure unit selectable: mbar, Torr and Pascal
- Windows software for measuring data storage and PC analysis in the accessory pack

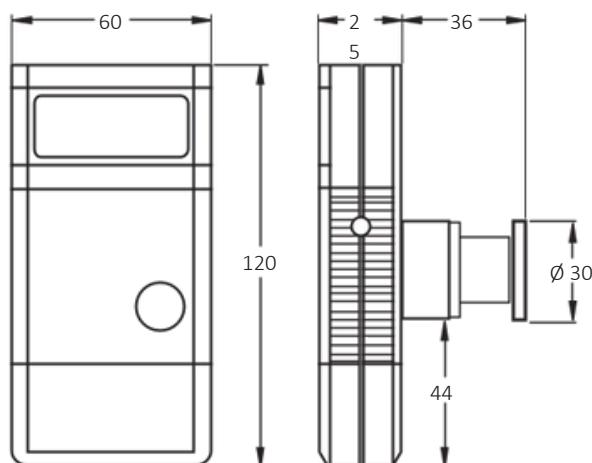

MEASUREMENT PRINCIPLE

The Edwards P3 provides high resolution covering the complete measurement range due to the usage of two different physical sensor principles. It is equipped with an internal Piezo electric sensor for high pressure measurement and a Pirani sensor for covering the lower pressure range. The filament is heated to a constant temperature in a bridge circuit. The necessary bridge voltage is subject to the total pressure measurement. The Piezo electric element measures > 15 mbar independently of the type of gas. In the lower measurement range the adjustable gas correction factor permits a measurement for selected gases other than air.

TYPICAL APPLICATIONS

- Mobile and fixed pressure measurement installations of all kind, including; service, maintenance, universities and laboratory applications
- Food and packaging industry
- Vacuum process quality assurance
- Visualisation and documentation of vacuum pumps and systems

VS16K & IS16K VACUUM SWITCHES

The VS16K is a general purpose vacuum switch with a user adjustable set point and a small switching differential. The switch point can easily be set using a screwdriver over the range 30 - 1000 mbar.

The IS16K vacuum interlock switch is designed to safeguard the operator by ensuring that electrical circuits in the vacuum chamber do not remain energised when the system is let up to atmosphere.

Typical applications include interlocking of the HT cleaning or processing circuits on thin film deposition and vacuum systems.

APPLICATIONS

- Furnaces
- Laboratories
- Tank units
- Packaging
- General purpose pumping units

FEATURES AND BENEFITS

- VS16K
 - High vacuum compatible - only stainless steel parts exposed to vacuum
 - Set point independent of gas composition - ideal for backfilling applications
 - “Normally Open” and “Normally Closed” contacts
- IS16K
 - Single non-adjustable set point - cannot be tampered with
 - High vacuum compatible - only stainless steel parts exposed to vacuum

CG16K CAPSULE DIAL GAUGES

Barometrically compensated dial gauges with NW flange fittings. Edwards CG 16K capsule dial gauges cover the range from atmosphere of 0 to 1040 mbar.

These robust gauges provide accurate, repeatable performance even at low pressures making them equally suited for non-corrosive process plant or for laboratory applications.

Fitting is simple: the gauges can be mounted direct or panel mounted using the kit supplied.

Features and benefits

- Accurate to $\pm 2\%$ F.S.D.
- Barometrically compensated unaffected by changes in atmospheric pressure
- Reading independent of gas type
- Rugged aluminium casing with removable bezel for cleaning

Applications

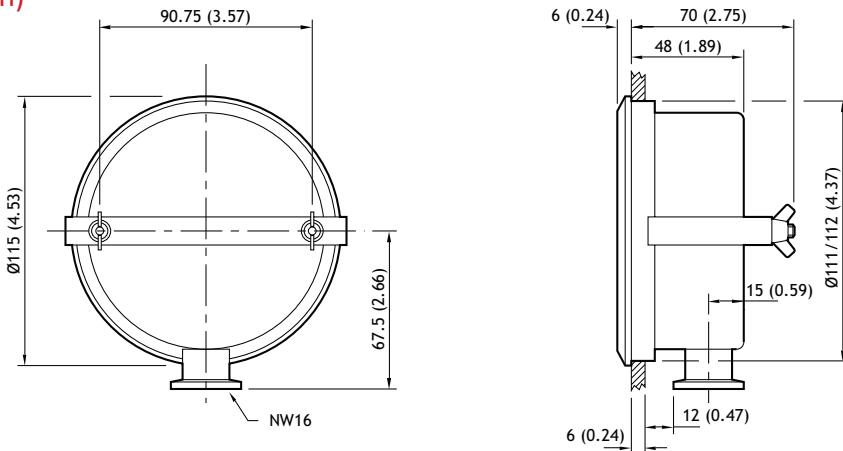

- Backfilling
- Portable equipment
- Degassing
- Refrigeration
- Flammable vapours
- Upgrade from Bourdons
- Packaging
