nEXT55 TURBOMOLECULAR PUMP

nEXT55 is one of the smaller members of the nEXT family and has been extended to include variants that can be mounted in any orientation. These variants deliver the same performance characteristics as our current pumps but with more flexibility.

This turbomolecular pump is an evolution of Edwards extremely popular nEXT85 platform, with a significantly reduced height while still offering pumping speeds of 55 l/s for nitrogen. nEXT55 offers the highest pumping density of other pumps in its class, with almost double the pumping speed of similar sized turbo pumps.

As it is built on the proven nEXT85 platform, nEXT55 offers high reliability and low risk to adoptors. Also, like nEXT85, field maintenance is only required every 4 years of operation, and this - including replacement of the bearing - can be performed by the end user. nEXT55 brings with it all the benefits in flexibility associated with nEXT85, with the same comprehensive communication and control options available, as well as a full set of accessories.

nEXT55 is the ideal choice in deployable instruments or portable applications where a compact footprint or lower weight are key factors.

FEATURES AND BENEFITS

- Any orientation for flexibility of use
- Class leading pumping speeds
- Outstanding compression ratios
- Ease of integration and installation
- Assured reliability
- End user service capability
- Full nEXT established communication interface

PRODUCT DATA SHEET

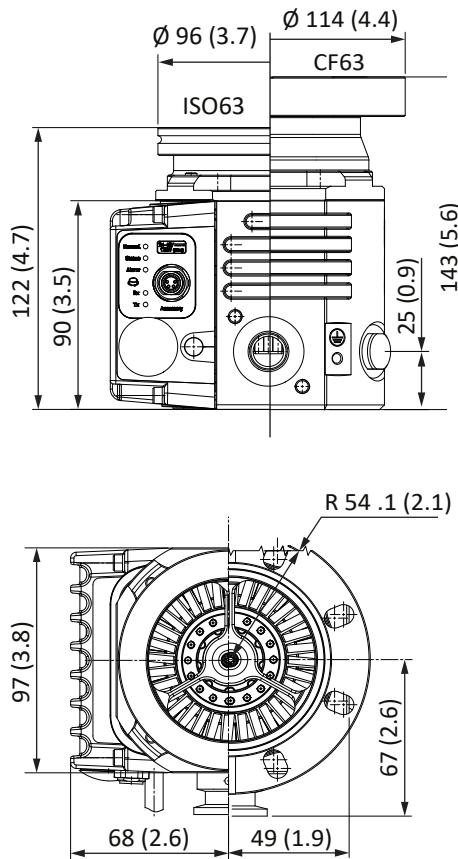

TECHNICAL DATA

nEXT55			
Pump interface			
Inlet flange	NW40	ISO63/CF63	
Exhaust flange	NW16	NW16	
Vent port		1/8 inch BSP	
Key technical specifications			
Rotational speed	Rpm	90,000	
Start time to 90% speed (sec) D		90	
	N ₂	35	55
Main inlet pumping speed (l/s)	He	26	41
	H ₂	17	27
	Ar	35	55
Peak compression ratio backing port to main inlet port (D)	N ₂	>1x10 ¹¹	
	He	6.9x10 ⁵	
	H ₂	2.9x10 ⁴	
	Ar	1x10 ¹¹	
Ultimate pressure	mbar	<1x10 ⁻⁷	
Sound pressure level	dB(A)	34 +/- 2.5*	
Mass (kg) D		ISO 2.47 - CF 3.5	
Pumped media			
Designed gas compatibility*	Air, CO, Ne, N ₂ , Kr, Ar, CO ₂ , He and H ₂ . O ₂ concentration must be less than 25% by volume. Water vapour must not condense inside the pump		
Ambient operating temperature range	°C	5 to 40	
Storage temperature range	°C	-30 to +70	
Cooling method, optional		air/water	
Cooling method, standard		Free convection	
Maximum external magnetic field	mT	5 radial	
Enclosure protection		IP64	
Electrical rating			
Power supply	v	24-48 Vd.c +5% - 10%	
Max power consumption	W	120W	
Factory default setting	W	Refer to pump label	
Connector		15-way D-Type male	

*declared dual number noise emission values in accordance with ISO4871

** To pump an unlisted gas species, contact the supplier for advice

nEXT730, 930 AND 1230 TURBOMOLECULAR PUMP

Edwards are proud to offer the nEXT730, nEXT930 and nEXT1230 turbomolecular pumps, these larger pumps offer choices for customers requiring higher pumping speeds from 730 up to 1250 l/s for nitrogen.

As well as addressing the R&D market, where high compression, faster pumping speeds are required, these pumps are also designed to meet the requirements of the coating market and other diffuse market sectors such as Heat treatment, Furnace applications, Ebeam welding, Etch, Ion implant, Degassing and Cylinder evacuation.

For our OEM customers derivative versions of these products can be developed, just like the existing nEXT pumps, and like the existing nEXT pumps split flow variants are possible. This will give benefits for our customers with larger instruments as well as the possibility to reduce the total number of pumps on existing instruments.

The new products offer market leading performance for pumps of their class, and in a compact footprint. The pumps feature bearings with a typical life time of at least 4 years with no maintenance, which can then be replaced simply and economically by the customer themselves when required or customers may choose from our other service support offerings.

The pumps are able to operate in any orientation*, and are supported by a full range of accessories for cooling, venting, powering and control.

* for nEXT1230, inverted option available

FEATURES AND BENEFITS

- Class leading pumping speeds
- Outstanding compression ratios
- Ease of integration and installation
- Assured reliability
- End user service capability
- Full nEXT established communication interface
